

November 13, 2008

The STEP Dearborn North Production facility was paid a visit from Global Engine Manufacturing Alliance (GEMA), the group consisted of quality managers, supply chain managers, finance and the plant manager Bruce Baumbach. GEMA makes a four speed engine as a joint venture of Chrysler, Hyundai, and Mitsubishi Motors. Dearborn North has been doing work for GEMA since January of 2008.

The group headed by Bruce Baumbach wanted to express their thanks to our consumers on a job well done and expressed that they would like to make this a long term relationship. Tokens of appreciation were handed out to the consumers that are currently working on the project along with sincere appreciation. An invitation was given to Kim Vasicek and production managers to tour the GEMA facility in hope to find more work for consumers. The tour is slated for the end of January 2009.
